

**Abstract of Disclosure:** Athletic shoes have evolved into a very desirable and trendy piece of clothing. They are available in many shapes, sizes, and colors. However, to date all shoe pieces and designs are fixed to the shoe. My technology will allow shoe colors and or designs to be changed daily and as easily as the rest of one's clothes while utilizing only one pair of shoes. Interchangeable pieces will be made useful just as different colored shoestrings are now available.
